

InnoTesting

The Future of Simulation and Testing

Wildau (Berlin), February 23 - 24, 2012

Simulation and testing have always played a significant role in improving safety and reliability in aviation and space technology. This conference will supply a forum for discussion for industry, equipment suppliers, service providers and research institutions with a special focus on the transfer of testing methods from aerospace to other sectors (automotive, railroads...) and IT-based simulation.

Held under the patronage of the Federal State Prime Minister of Brandenburg, Mr. Matthias Platzeck, InnoTesting is organised by BBAA-Berlin Brandenburg Aerospace Alliance, Wildau Technical University of Applied Sciences and Schönefelder Kreuz Aerospace Technology Centre. Use this unique opportunity to meet experts from well-known industry firms and research institutions as AneCom, EADS Eurocopter, GEVA, IMA Dresden, Rolls-Royce and many more to share knowledge and experience on:

- requirements for products and services (certification, quality standards, environmental issues.....),
- innovative test design and organisation (research and development, production, maintenance, case studies.....),
- the economics of simulation and testing (process optimisation, supply chain management, integration models...),

Shop visits to the Rolls-Royce MTOC and the AneCom testing facilities are part of the program. Thursday evening there will be a conference dinner at the historic Koenigs Wusterhausen castle (bus transfer provided). The conference is held in Wildau, situated in the vicinity of Berlin-Schoenefeld airport (soon to be Berlin-Brandenburg International Airport).

The conference fee is 240 € plus 19 % German VAT (total 285,60 €). There is a limited number of tickets available for students for a reduced fee of only 80 € plus 19 % German VAT (total 95,20 €). The fee includes full documentation, two business lunches, shop visits, conference dinner and bus transfer between conference site and testing facilities and the dinner location.

Further information can be obtained at www.innotesting.com. Make your reservation now online or by sending the necessary information by fax: + 49 (0) 3375/5238-44 (Schönefelder Kreuz Aerospace Technology Centre).
